- Data analysis, technical reporting, and result interpretation
- Team leadership, supervision, and staff training
- Safety protocols enforcement and risk management

- Resource planning, budgeting, and inventory control
- Process optimization and continuous improvement initiatives
- Collaboration with engineers, contractors, and project stakeholders
- Research and development of advanced testing methodologies
- Troubleshooting and resolving testing discrepancies
- Documentation control and audit preparedness
- Strong problem-solving and decision-making skills

Professional Experience:

9+ Years

LAB ENGINEER

ROCKWELL CORP. Pvt Ltd, Pakistan

November 2021 to January 2024

Job Responsibilities:

- Conduct material testing and analysis for soil, concrete, asphalt, aggregates, and other construction materials to ensure compliance with industry standards and project specifications.
- Prepare detailed technical reports and documentation based on test results, ensuring accuracy and clarity.
- Operate, calibrate, and maintain laboratory equipment and instruments to ensure optimal performance and reliability.
- Monitor and ensure quality control of construction materials used in projects, identifying and addressing any deviations or issues.
- Collaborate with project teams to provide technical support and recommendations based on test findings.
- Perform field inspections and collect samples for laboratory analysis as required.
- Ensure compliance with safety protocols and standards in the laboratory and on-site.
- Supervise and guide junior lab technicians, providing training and support as needed.

- Stay updated with industry standards, codes, and best practices related to material testing and quality assurance.
- Assist in the development and implementation of laboratory procedures and protocols to improve efficiency and accuracy.
- Liaise with contractors, engineers, and project managers to address material-related concerns and provide solutions.
- Maintain accurate records of tests, results, and equipment maintenance for audit and reference purposes.

SENIOR LAB TECHNICIAN

C N A Engineering & Services, Pakistan

July 2018 to October 2021

Job Responsibilities:

- Perform advanced testing and analysis of construction materials such as soil, concrete, asphalt, aggregates, and steel to ensure compliance with project specifications and industry standards.
- Supervise and mentor junior lab technicians, providing guidance, training, and support to ensure accurate and efficient testing procedures.
- Prepare and maintain detailed records, reports, and documentation of test results, ensuring accuracy and timely submission.
- Operate, calibrate, and maintain laboratory equipment and instruments, ensuring proper functionality and adherence to safety standards.
- Monitor and enforce quality control procedures to ensure the reliability and consistency of test results.
- Assist in the development and implementation of laboratory protocols and procedures to enhance efficiency and accuracy.
- Conduct field inspections and collect samples for laboratory analysis, ensuring proper handling and storage.
- Collaborate with engineers, project managers, and contractors to provide technical insights and recommendations based on test findings.
- Troubleshoot and resolve technical issues related to material testing and laboratory operations.

- Ensure compliance with health, safety, and environmental regulations in the laboratory and on-site.
- Stay updated with the latest industry standards, testing methods, and technological advancements in material testing.
- Manage inventory of laboratory supplies and equipment, ensuring availability and proper usage.

LAB TECHNICIAN

Askari Cement Limited Wah, Pakistan

July 2015 to June 2018

Job Responsibilities:

- Assist in conducting basic material testing for soil, concrete, asphalt, and aggregates under the supervision of senior technicians or engineers.
- Prepare and process samples for testing, ensuring proper labeling, handling, and storage.
- Operate basic laboratory equipment and instruments, following standard procedures and safety guidelines.
- Record and organize test data accurately, assisting in the preparation of reports and documentation.
- Clean and maintain laboratory equipment, tools, and workspaces to ensure a safe and efficient working environment.
- Support senior technicians in calibrating and troubleshooting laboratory instruments as needed.
- Learn and adhere to industry standards, testing protocols, and safety regulations.
- Assist in collecting samples from construction sites for laboratory analysis.
- Follow instructions and guidelines provided by supervisors to complete tasks efficiently and accurately.
- Participate in training sessions to develop technical skills and knowledge in material testing and laboratory procedures.
- Communicate effectively with team members and supervisors to ensure smooth workflow and address any concerns.
